

Operating System information, windows, Linux, macos installation and adjust OS settings

- 1) On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

The screenshot shows the Windows 'System Information' window. At the top, it says 'LAPTOP-8DAJH4OB' and 'Victus by HP Gaming Laptop 15-fa2xxx'. There's a 'Rename this PC' button. Below is a 'Device info' section with a 'Copy' button. It lists: Device name (LAPTOP-8DAJH4OB), Processor (13th Gen Intel(R) Core(TM) i5-13420H (2.10 GHz)), Installed RAM (16.0 GB (15.6 GB usable)), Graphics card (NVIDIA GeForce RTX 4050 Laptop GPU (6 GB) and Intel(R) UHD Graphics (128 MB)), Storage (78 GB of 477 GB used), Device ID (E66691E0-FE12-49BD-A88A-FF42740A9444), Product ID (00342-42788-27052-AAOEM), System type (64-bit operating system, x64-based processor), and Pen and touch (No pen or touch input is available for this display). Below this is a 'Related links' section with links to 'Domain or workgroup', 'System protection', and 'Advanced system settings'. At the bottom is a 'Windows info' section with a 'Copy' button, showing the Edition as 'Windows 11 Home Single Language'.

Device info	
Device name	LAPTOP-8DAJH4OB
Processor	13th Gen Intel(R) Core(TM) i5-13420H (2.10 GHz)
Installed RAM	16.0 GB (15.6 GB usable)
Graphics card	NVIDIA GeForce RTX 4050 Laptop GPU (6 GB) Intel(R) UHD Graphics (128 MB)
Storage	78 GB of 477 GB used
Device ID	E66691E0-FE12-49BD-A88A-FF42740A9444
Product ID	00342-42788-27052-AAOEM
System type	64-bit operating system, x64-based processor
Pen and touch	No pen or touch input is available for this display

Windows info	
Edition	Windows 11 Home Single Language

- 2) Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation.
Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

Create a Bootable Linux USB using Rufus/BalenaEtcher

Steps:

- Download a Linux ISO:
 - Example: Ubuntu ISO from the official website.
- Download and install Rufus or BalenaEtcher.
- Insert an empty USB drive (8GB or larger).

- Open Rufus:
 - Select USB device.
 - Select Linux ISO file.
 - Click Start.
- Wait until the bootable USB creation completes.

- 3) On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati.

Hint: Find 'Language & Region' in System Preferences to add or change languages.

❖ Change Wallpaper and Language on macOS

Steps:

- Open System Preferences / System Settings.
 - Go to Wallpaper.
 - Select a new desktop wallpaper.
 - Open Language & Region.
 - Click + Add Language.
 - Select:
 - Hindi (हिन्दी) or
 - Gujarati (ગુજરાતી)
 - Apply changes and restart if required.
- 4) Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

❖ Steps:

- Install Ubuntu on a PC or Virtual Machine.
- During installation:
 - Create a new user:
 - Username: gamer
- After installation:

- Open Settings → Users.
 - Enable Automatic Login for user gamer.
 - Restart Ubuntu.
 - Take a screenshot showing the login/user screen with gamer.
- 5) Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

Step 1: Create Windows 10 Bootable USB

- Download Windows 10 ISO.
- Use Rufus to create a bootable USB.
- Insert USB into laptop.
- Restart and open Boot Menu:
 - Common keys: F12, F9, Esc, or Del.

Step 2: Install Windows

- Select language and keyboard layout.
- Click Install Now.
- Enter product key or choose "I don't have a product key".
- Select Windows edition.
- Choose Custom Installation.

Step 3: Partitioning Tips

- Delete old partitions only if you have a backup.
- Create:
 - **C: Drive** → Windows system files (around 100–150 GB recommended)
 - **D: Drive** → Personal files
- Select the Windows partition and click Next.

Step 4: Complete Setup

- Create user account.
- Connect to Wi-Fi.
- Install drivers:
 - Graphics driver
 - Audio driver

- Network driver

Step 5: Privacy Settings

Recommended settings:

- Turn off unnecessary location tracking.
- Disable unwanted diagnostic data sharing.
- Review app permissions.
- Disable unnecessary startup apps.

Step 6: Updates

- Open:
Settings → Update & Security → Windows Update
- Click Check for Updates.
- Install all important updates.
- Restart the system.
